

# DATA CENTRE

**Data Centre** is a highly specialized Information and Communications Technology (ICT) management service, where experts take over the running of your technical operations.

## The Service

The cost of operating and managing one's own application infrastructure can be unnecessarily expensive, with immense pressure on your ICT resources. Qualitynet's Data Centre allows you to minimize these issues by allowing the experts to run

your technical activities, while you concentrate on your core business. With our Global Connectivity and widespread reach in Kuwait, our Data Centre is equipped to meet your every need. Services include dedicated Internet connectivity, application & web hosting and ICT service management.

# DATA CENTRE

## Key Benefits

### **Cost Efficiency**

When you assign Qualitynet to supervise, operate and maintain your data environment, you eliminate the need to setup your own data centre, thereby reducing costs, while leveraging on the world class infrastructure that we already have in place.

### **Secure Managed Hosting**

Focus on your core business and let us take care of your data & applications with our experts made available round-the-clock, providing support and maintenance.

### **Package Deal**

The service includes equipment hosting, uninterrupted power supply (UPS), security, equipment monitoring, comprehensive fault reporting, help desk and network management.

### **Connectivity**

Our Data Centre provides fast local and international interconnections between your network and public networks.

## Key Features

### **Modular Design**

Our modular Data Centre design provides your business with a number of infrastructure options, including firewalls, server hosting & management, storage and databases for your various requirements.

### **Reliability**

Diverse circuit routing into Qualitynet's facilities management site ensures that outages are minimized in the event of a failure, thereby ensuring best possible disaster recovery environment.

### **Constant analysis**

Qualitynet will constantly monitor service levels in the Data Centre and provide you with service level agreed response times.

### **Full options**

In addition to the services offered through the Data Centre, Standby Power, Air conditioning and Temperature control becomes our responsibility, allowing you to remain hassle free.
