

# GLOBAL MANAGED PRIVATE LINE (GMPL)

**GMPL** enables secure and reliable end-to-end connectivity for your business.

## The Service

Global MPL is a managed service which employs digital fibre-optic cabling to provide end-to-end private circuits between two international destinations, with a single point of contact, facilitating the ordering, provisioning and management of the service.

The service meets the many needs of multinational companies, for reliable international private circuits, that can be easily ordered and managed. Global MPL is ideally suitable for companies that are currently having half-circuits and that wish to migrate to a point-to-point connectivity solution, which is completely managed.

# GLOBAL MANAGED PRIVATE LINE (GMPL)

## Key Benefits

### **Wide Coverage**

Global MPL is available in many of the world's important business centres.

### **Availability**

The availability levels offered by Global MPL reduce the need of additional network redundancy and backup options.

### **Single Point of Contact**

A single point of contact for ordering, provisioning, billing and maintenance makes the service a very convenient one. Management activities are carried out by Qualitynet on a regular basis to maintain and upgrade the service.

### **Round-the-Clock Support**

Multi-lingual support is provided round-the-clock by regional Service Management Centres, ensuring reliability of service.

## Key Features

### **Bandwidth**

Global MPL circuits are available at bandwidths ranging between 64 kbps and 1984 kbps.

### **Network topology**

Global MPL is delivered on a professionally managed data network; an overlay of fibre-optic cables connecting the world's major trading centres.

### **Specifications**

Global MPL circuits support various commonly used interface options.
