

@Home - A packaged solution for your Internet needs

When Residential DSL started to show increased favour among Internet users in the country, Qualitynet went all out and improved the offering by introducing many options in the pricing and speeds. This made the service easily affordable for anyone who wanted to experience quality Internet. However, as the usage of DSL Internet grew, there arose a new need in the Internet market - the need to provide improved convenience.

To cater to this need, the company introduced '@Home', a packaged solution for the ultimate home Internet experience. The service consists of a high-speed DSL connection, a State-of-the-Art Laptop and a high-end wireless modem. The equipment is from highly reputed brands, and is tuned to deliver our service at the highest of quality and performance

levels. The solution converts your home into a wireless zone, where you would be free from any connecting wires.

Qualitynet's '@Home' is more about the freedom and convenience it delivers. The freedom from wires, from the need to run around looking for the right equipment and from the concern on quality service. Convenience of customizing your service options, between DSL speeds, Laptop brands and Payment options. For a non-internet user, subscribing to the service converts him into a customer of the best service in the market. And for existing Internet users, this offers a very flexible platform to upgrade.

The service charges can be paid monthly through installments, which are very low and affordable. And to top it all, the laptop and wireless modem is yours to own, once your installments are cleared.

With rising needs for convenience, Qualitynet's @Home service is what you need for Internet in your home. A complete package for your home Internet needs - that's what @Home is about.

With a number of service providers in the country, Qualitynet is the only provider of a complete Internet package for home users, consisting of high speed DSL, a State-of-the-art Laptop and a Wireless Modem with flexible payment options.
